SUMMARY

Front-End Developer with experience since **2022** building production-grade **React** and **Next.js** applications across **hosting platforms, healthcare, and education sectors.** Specialized in **admin** panels, **client** dashboards, and commercial **landing** pages, with a consistent focus on resolving critical **bugs**, modernizing legacy stacks, and improving system stability and user experience.

Comfortable owning features end-to-end, from architecture decisions through deployment.

WORK EXPERIENCE

2024/05 – Present
Tehran, Iran

Front-End Developer, Mobin Host (Megan)

- Own front-end development for Megan, a large-scale hosting platform, spanning the admin panel, client dashboard, and marketing landing pages.
- Built and shipped multiple in-panel operations covering service management, data handling, and user interaction workflows.
- Resolved critical, production-impacting bugs and led technology stack updates that improved system stability and user experience across the platform.

2023/05 – 2024/04
Tehran, Iran

Front-End Developer, Kasbotech

- Designed and developed commercial web applications for DigiDentall, prioritizing smooth, modern UI and consistent design implementation.
- Re-architected core parts of the project and upgraded the technology stack to improve long-term maintainability and developer velocity.
- Identified and resolved key bugs across multiple active projects, directly improving the end-user experience.

2022/01 – 2023/05
Tehran, Iran

Front-End Developer, Gostaresh Binesh Vala (Education Sector)

- Built responsive, component-based pages in React for Anjoman Meli, a platform connecting parents and school staff.
- Integrated REST APIs and implemented client-side data-handling logic to support core platform features.
- Improved code quality and reduced UI errors, enhancing both user experience and page performance.

TECHNICAL SKILLS

Frontend — React, Next.js, TypeScript, JavaScript • **UI & Styling** — Tailwind CSS, shadcn/ui, MUI, SCSS (SASS), Bootstrap • **State & Data** — TanStack Query (React Query), Zustand, Redux Toolkit, Redux • **Forms & Validation** — React Hook Form, Zod • **Routing & API** — React Router, REST API, Axios, Fetch • **Databases** — PostgreSQL, MySQL, MongoDB • **Other** — Progressive Web Apps (PWA), Responsive Web Design, Git & GitHub
